Airport and Maritime
Operations Manual

Airport Operations

Overview

PPQ staffs airports to minimize the risk of introducing agricultural pests and animal diseases associated with the movement of aircraft. All aircraft from Hawaii, U.S. territories and possessions, and foreign locations are subject to inspection.

The *Airport Operations* chapter is organized into sections by tasks which are tabbed as follows:

- ◆ Prerequisites to Clearing Aircraft
- ◆ Clearing Aircraft
- ◆ Clearing Passengers/Crew
- ◆ Controlling Cargo
- ◆ Controlling Garbage

Use the table of contents which follows each tab to find the information you need. If the table of contents is **not** specific enough, then turn to the index to find the topic and its page number.
